

Quality Assurance Engineer

Corda Technologies, a rapidly growing software company and leader in data visualization and executive dashboard software, is expanding our development team.

We are searching for creative and hard working QA engineers with 0-1 years of experience who want to work as part of a highly productive development team.

As one of the best places to work in Utah County, Corda offers a competitive salary along with an exciting benefits package including medical, dental and vision insurance, 401(k) retirement plan, life insurance, short-term and long-term disability insurance, health club benefit, and a very fun and active environment.

Essential Duties and Responsibilities

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill, ability, and education required.

- Works with a scrum team of developers to supplement testing needs.
- Owns all testing in a functional area.
- Performs exploratory, functional, system, and reliability testing tasks, as necessary.
- Creates software testing requirements/test cases.
- Reports detailed software defects.
- Performs other duties as assigned.

Qualifications

Required

- Bachelor Degree or pursuing a degree in Computer Science, Information Systems or equivalent experience.
- 1 year or less of QA or software testing experience.
- Demonstrated aptitude and abilities with computers and computer software.
- Ability to accurately estimate task durations and meet schedules.
- Strong analytical and problem solving skills and attention to detail.
- Good verbal/written communication skills.
- Self-motivated.

Preferred

These skills are preferred, but not required:

- Knowledge or general understanding of software testing or quality assurance principles, methods, and processes.
- Experience with web design and technology.

- Experience with Java, Perl, Python, JavaScript or any other shell scripting language or programming language.
- Experience with XML.
- Experience in Unix (Linux, HP-UX, AIX, Solaris).
- Experience with Microsoft SQL Server, DB2, Oracle, or MySQL in a QA environment.
- Understanding of network protocols and configurations.
