

## Professional Services Engineer

Corda Technologies, a rapidly growing software company and leader in data visualization and executive dashboard software, is expanding our services team.

We are searching for a hard working Professional Services Engineer with 3+ years of experience who wants to work as part of a highly respected, industry expert and technical services team. This individual would be based from their home office in the greater Washington D.C. area and have the ability to range up to 50 miles thereabout.

As one of the best places to work, Corda offers a competitive salary along with an exciting benefits package including medical, dental and vision insurance, 401(k) retirement plan, life insurance, short-term and long-term disability insurance, health club benefit, and a very fun and active environment.

### Position Description:

As a Professional Services Engineer your responsibility is to provide pre and post-sales services for Corda customers. This position requires strong technical and communication skills, both verbal and written. The ability to work with customers under a variety of circumstances and understand and meet customer expectations is a requirement. The individual must be a self-starter with strong problem solving skills. As the technical lead for a customer implementation you will work together with an account manager as primary customer contact to develop the best strategy for a successful implementation. A large part of the PSE's responsibilities will likely consist of scoping, designing, documenting and implementing integration requirements.

The PSE should also be able to assist in the sales cycle to understand, size and scope customer requirements. Travel required and occasionally could be up to 50% of the available business time in a work month. Off hours work (evenings and weekends) required rarely based on customer needs.

### Required Skills:

- 3+ yrs experience in a professional services environment, or equivalent in enterprise software development and integration for web based applications.
- In depth knowledge developing and deploying web applications, J2EE applications in particular
- Knowledge of and experience using Java, XML, javascript, CSS
- Knowledge of and experience working directly with relational databases
- Strong communication, logical and analytical skills
- SQL experience a must
- Ability to travel up to 50% of a business month
- Would be strongly beneficial to have creative design and UI skills

### Personal requirements:

- Strong execution mentality, self starter, great communication skills, ability to tackle new challenges routinely

### Compensation:

DOE

Base Salary and benefits.

MUST BE AUTHORIZED TO WORK IN THE U.S.

Corda is an Equal Opportunity Employer
